

## NATURAL OIL WOODSTAIN

OSMO Natural Oil Woodstain is a decorative, satin wood finish which combines all the advantages of oils and waxes in one unique product. Resistant to water, dirt and stains.

Easy application - no primer is required, and sanding between coats is not necessary in most cases.

The finished surface is microporous, which allows the wood to breathe, reducing swelling and shrinkage. Water repellent, extremely weather resistant and UV stable, the surface does not crack, peel, flake or blister.

905 Patina

906 Pearl Grey

907 Quartz Grey

The colours above are a true likeness of the original, after application onto Spruce. However, some variation may occur due to screen brightness, the uploading process and if these pages are printed.

It is recommended to test the colours you require on a small sample of your timber, as colours may appear differently on other wood species.
