This aftercare pack has been produced by Natural Oils Ltd using Osmo products.

Supplying environmentally friendly products to New Zealanders for over 20 years.

Aftercare Pack

Caring for interior timber surfaces such as benchtops, cabinetry and furniture which have been finished with Osmo products

Caring for timber furniture and benchtops finished with Osmo products

This general information sheet is a guide for caring for interior timber benchtops, timber furniture and cabinetry etc in a domestic situation, or a commercial area such as a restaurant or café. Timber items finished with Osmo products in accordance with the Manufacturer's instructions are automatically water and dirt resistant. However, the surfaces will require on-going care. This will depend upon the degree of usage.

Damp cleaning:

Most of the time, a soft cloth dampened with fresh water will be all that is required to clean the surface.

Where a more thorough clean is needed, we recommend using Osmo Spray Cleaner, which is a premixed solution in a ready to use 500ml trigger pack. The solution contains soaps based on natural plant oils. The ingredients are water soluble and prevent streaking and layer build up. Especially mild on skin, the solution is biodegradable, and is free from dyes, solvents and emissions. The surface remains food safe. Use as often as required.

Avoid using regular household or harsh chemical detergents, as these are designed to dissolve grease and oil, and over time, will break down the Osmo finished surface.

Rejuvenation:

When the timber is looking faded or dull, after continual usage over time, it may need some form of rejuvenation. This rejuvenation could be monthly, yearly or whenever it is considered necessary. In most cases, the use of Osmo's Liquid Wax Cleaner Spray will be all that is required. Use the spray sparingly. Apply an even, thin coat over the whole area, and then buff the timber using the hand pad and white buffing pad.

Osmo products are manufactured by Osmo Holz und Color GmbH & Co. KG, Warendorf, Germany.

Osmo Spray Cleaner

- Ready to use spray solution
- Highly effective
- Easy application
- Contains soaps based on natural oils
- Ideal for care of surfaces finished with Osmo products such as Polyx or Top Oil
